1. Website Overview

AKOO is an international clothing and fashion e-commerce website.

This audit reviews its homepage using Google PageSpeed Insights and Google's Rich Results Test.

SEO	92/100	92/100

Core Web Vitals: Passed on both mobile and desktop real-user assessments.

Note: Real-user Core Web Vitals and Lighthouse lab tests measure performance differently. Real-user assessments passed, while simulated mobile testing showed slower loading performance.

2. Improve image delivery and sizing.
3. Reduce render-blocking resources.
4. Review descriptive link text.
5. Review breadcrumb structured data.

6. Conclusion

The audit identified opportunities to improve simulated mobile loading performance, particularly JavaScript execution, image delivery, and render-blocking resources.

Although real-user Core Web Vitals passed, further technical investigation is recommended to improve the mobile experience.
